

Your Wild Life

Today I found... An Eastern Bluebird

This nature activity is brought to you by Owen W. He learned that Bluebirds clean out waste from their nests!

Common throughout Ohio, these bright birds are most often found in open areas such as fields.

Bluebirds forage for bugs including caterpillars, beetles and spiders. Their diet also contains fruit and berries.

These bluebirds nest in cavities, either natural or man-made.

Eastern Bluebird
Sialia sialis

Attract these birds to your yard with a mealworm feeder!
